

CAPABILITY STATEMENT

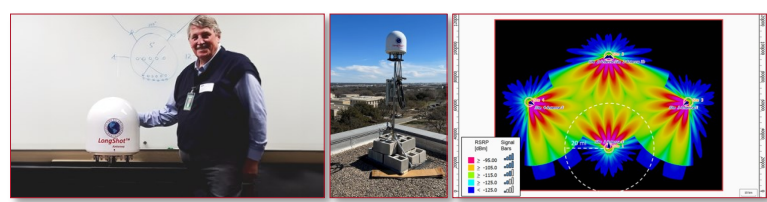

AMERICAN-ANTENNA.COM

American Antenna Company, LLC specializes in the development of advanced long-range 5G antennas, leveraging cutting-edge technology and specialized engineering expertise to enhance wireless network efficiency and connectivity. Our products are designed to extend the reach of 5G signals across vast distances, supporting a wide range of applications with improved reliability and performance.

CORE COMPETENCIES

- **The LongShot™ 5G Wireless Antenna:** Specializing in the innovation of long-range 5G antennas, our products are designed to enhance connectivity and network performance across extensive distances, ensuring reliable and efficient communication solutions
- **Engineering Excellence:** Our team's expertise in specialized engineering supports the development of cutting-edge telecommunications solutions, focusing on the creation and optimization of 5G technologies for diverse applications
- **Network Efficiency Solutions:** We offer solutions aimed at elevating wireless network efficiency, utilizing our advanced antennas to improve signal strength, reduce latency, and support a broad spectrum of communication needs
- **Customized Connectivity Solutions:** Tailoring our 5G antenna technology to meet specific operational requirements, we ensure our clients receive optimized, application-specific solutions for their unique connectivity challenges
- **Reliability & Performance:** Our commitment to quality guarantees that our long-range 5G antennas are reliable, durable, and perform at the highest standards, even in the most demanding environments

PRIMARY NAICS & PSC CODES

- 334220** - Radio & Television Broadcasting & Wireless Communications Equipment Manufacturing (P)
- 5985** - Antennas, Waveguides, & Related Equipment

COMPANY SNAPSHOT

- CAGE:** 9HQ04 **UEI:** NLZ7KPYWHB27
- Gov. Business POC:** Robert Murrill, EVP
- Phone:** (972) 839-0645
- E-Mail:** bob@robertmurrillpc.com
- Address:** 7605 Burns Run, Dallas, TX 75248
- Work Area:** Worldwide
- Socio-Economic:**
 - Self-Certified Veteran-Owned Small Business

DIFFERENTIATORS

- **88% Annual Operating Cost Savings:** Demonstrating significant reductions in annual operating costs, our solutions provide substantial financial advantages, optimizing budget efficiency for government projects
- **Substantially Expanded Coverage Area:** Our technology ensures an extensive increase in coverage area, enabling robust connectivity across larger distances, which is critical for comprehensive communication networks
- **Enhanced Bandwidth Capabilities:** We offer superior bandwidth enhancements, facilitating faster data transmission and supporting higher volumes of traffic, crucial for modern communication demands
- **Minimal Installation and Maintenance Expenses:** Our solutions are designed to minimize upfront installation costs and ongoing maintenance expenses, providing a cost-effective approach to infrastructure deployment
- **Easy and Straightforward Installation Process:** The simplicity of our installation process ensures rapid deployment and operational readiness, reducing downtime and accelerating project timelines
- **Lightweight Design for Effortless Deployment:** The lightweight nature of our products simplifies logistics and deployment, allowing for flexible installation in diverse environments, from urban settings to remote locations
